No meu quando executo o saslauthd

```
[root@mailserver postfix]# saslauthd -v
```

```
saslauthd 2.1.19
```

```
authentication mechanisms: getpwent kerberos5 pam rimap shadow ldap
```

```
/usr/lib/sasl/smtpd.conf
```

```
pwcheck_method: saslauthd
```

```
saslauthd_version: 2
```
