Olá, aqui na celepar foi feito isto:

Main.cf:

```
#####
```

```
# SASL SUPPORT FOR SERVERS
```

```
#
```

```
# The following options set parameters needed by Postfix to enable
```

```
# Cyrus-SASL support for authentication of mail servers.
```

```
#
```

```
smtpd_sasl_auth_enable = yes
```

```
smtpd_sasl_security_options = noanonymous
```

```
broken_sasl_auth_clients = yes
```

e criei o arquivo /etc/postfix/sasl/smtpd.conf:

```
pwcheck_method: saslauthd
```

```
mech_list: login plain
```
